1 Instrumentation

The TRS met station consisted of the following instruments during 2003

Sensor	Serial number	Remark
Pt100		in Stevenson screen
Pt100		in Young screen
T/Rh		at 2 m (Young screen)
Young Wind Monitor		at 3 m
LiCor Li-200SB pyranometer		at 2 m
Tipping bucket precipitation gauge		at 2 m
Ventilated T/Rh		at 2 m
CR10 data logger		

2 Notes on the station data

- Problems with ventilated T/Rh throughout the year Although less NaN values in ventilated Rh many unrealistic values exist in the series.
- Problems (unknown) with Pt100 sensors in Young and Stevenson screens in the period 2002-09-11 17:00:00 to 2002-11-23 15:00:00. Bad data (but not NaN exist beyond the period.
- Based on the graph, it is evident that the Young shield Pt100 is not working well in December. This can be a program constants, reference resistor or zero offset calibration issue.
